

## TREMCO ROOFTOP SAFETY PRODUCTS & SERVICES

Tremco Roofing's rooftop safety products and services combine safety evaluations and recommendations with non-penetrating solutions designed with cutting edge technology, all supported by our professional safety solutions team who can help you find the right solution that meets your needs for safety and budget planning. Our line of safety products provide a long service life due to their high durability and corrosion resistance. These products require

little maintenance and are easy to clean, with little or no need for sandblasting, scraping, and painting. Most of our products are made of advanced fiberglass reinforced plastic (FRP) resin; the non-conductive properties of our FRP products make them a great choice for rooftop safety and help prevent injuries from slips, trips and falls.

# LEAD WITH SAFETY

With Tremco's Safety Product Line, You Too Can Lead With S.A.F.E.T.Y!

- Safer and Thermally Non-Conductive
- Affordable and Customizable
- Fire Retardant Properties
- Easy Installation
- TremSafe™ Inspection and Maintenance Program
- Year After Year Performance!

## LET TREMCO ROOFING BE YOUR SAFETY EXPERT

At Tremco Roofing & Building Maintenance, safety is the cornerstone of our business; we focus on *Leading with Safety* every day. Our robust safety culture and practices, as well as our industry-leading safety products and services offering, are designed to make your roof as safe as possible. Our commitment to safety stems from our passion to protect a company's most valuable assets, its employees. We're all aware that roofing is one of the most dangerous businesses in construction, and serious workplace injuries or death change lives forever – for families, friends, as well as our coworkers. With our commitment to having the best trained and equipped workforce in the industry, we naturally look to extend this same commitment to helping our customers possess the needed solutions and training to ensure their employees and service vendors are safe when working and accessing their roof.

# TURNKEY FALL PROTECTION SOLUTIONS BY TREMCO

Keeping You and Your Employees Safe When Rooftop Access is Required on Your Building.

**CROSSOVERS**  
Pre-engineered systems that allow for safe access over rooftop obstacles, such as piping, conduit, etc.

**MOLDED GRATING WALKWAYS**  
Gritted panels provide a safe, slip-resistant walkway that can be elevated to allow water to naturally flow to drains.

**DYNAWEIGHT FALL PREVENTION SYSTEM**  
Free standing, counterweight, modular protection system used as a rooftop anchor for fall restraint or arrest.

**SKYLIGHT GUARDS**  
Custom guards that protect individuals from falling through skylights, which are considered holes.

**DYNAROUND RG™ (ROOF GUARD)**  
Ballasted rooftop guardrail system that protects individuals from unprotected roof edges, sides, and openings.

**DYNAROUND HATCH GUARD**  
Enables safe entry and exit through a roof access hatch and protects individuals from falling through the hole when the hatch is left open.

**SERVICES**  
Annual inspections, certification and preventive maintenance can be provided.

**DYNARAIL® SAFETY LADDERS**  
Durable, slip resistant and secured for safe rooftop access.
